Coffman Engineers Ranks No. 58 in Top 100 MEP Engineering Firms in the U.S.

ANCHORAGE, AK (August 21, 2013) – Coffman Engineers has ranked number 58 among the top 100 mechanical, electrical, plumbing (MEP), and fire protection engineering firms in the United States, according to Consulting-Specifying Engineer.

“I am proud that Coffman Engineers ranks among such distinguished engineering firms, as it is a reflection our team’s continued focus on expanding our multidiscipline engineering capabilities into new markets and regions. Ranking on this list solidifies Coffman Engineers’ place in the national MEP engineering marketplace,” said Dave Coffman, founder, CEO, and chairman of Coffman Engineers.

The MEP Giants program is published annually by Consulting-Specifying Engineer. The program provides an in-depth analysis of the nation’s top-ranking MEP firms that reveals developments in the industry and how it has changed over the past few years. Collectively, the 2013 MEP Giants generated $39.5 billion in total revenue during the previous fiscal year and slightly more than $6 billion in MEP and fire protection engineering design revenue.

While new to the MEP Giants list, Coffman Engineers is regularly listed on the “ENR Top 500 Design Firms” list and recently made the “ZweigWhite Hot List,” both of which rank architecture and engineering firms at a national level. 2012 was a record year for Coffman Engineers, with gross revenue increasing 5% to more than $39 million and MEP design revenue accounting for more than $16 million. The firm also experienced a 7.6% employment growth in 2012 and opened their sixth office.

About Coffman Engineers
For more than 34 years, Coffman Engineers has provided civil, structural, industrial mechanical, commercial mechanical, process piping, electrical engineering and controls, lighting, project management, commissioning, and corrosion control engineering services. The company serves as prime or subcontractor on large, small, and diverse projects ranging from commercial to industrial work. Coffman Engineers has offices in Anchorage, Alaska; Hagatna, Guam; Honolulu, Hawaii; Los Angeles, California; and Seattle and Spokane, Washington. Follow us on Twitter @CoffmanEngineer.
