

Coffman Experience

CIVIL ENGINEERING

Our office locations focus us to understand the unique considerations of extreme cold weather design as well as the conditions that prevail in the Pacific Northwest and on the West coast.

Experience: our engineers are capable of design for permafrost, high water tables, snow drifting, frost heave, and sites/facilities located over federally designated aquifers.

Track Record: we have worked for Chugach Electric Association on an ongoing basis since 1991. They know, like many of our clients, that we are willing to go the extra mile. Our clients receive industrial/institutional/commercial/municipal experience from our Civil groups.

Capabilities:

- Access/Public/Private Roads
- Anti-Terrorism/Force Protection
- Environmental Restoration
- Erosion and Sediment Control
- Ordinance/Franchise/Easement Development Assistance
- Overhead & Underground Electrical Distribution
- Permit Acquisition and Assistance
- Pipelines
- Site Development and Grading
- Stormwater
- Utility Delivery (including Combined Sewer Systems)
- Wastewater Disposal
- Water Treatment
