

Coffman Experience

MECHANICAL ENGINEERING

Our designs are diverse and range from moisture control for aquatic facilities throughout the West, to the region's only Level-1 trauma center.

Experience: from health care facilities and data centers to building evaluations and forensic investigations, our knowledge base is broad and our project experience is deep, encompassing institutional, industrial, and commercial projects. Clients trust our knowledge of building environmental systems.

Track Record: our clients' confidence in our capabilities is the result of us continually concentrating on delivering value to provide not only maintainable designs, but designs that are sustainable and match the functional needs of our clients.

Capabilities:

Bulk Fuel Storage Systems

Clean Rooms

Central Plants

Commissioning

Compressed Air

Fire Protection

Forensic Investigations

Healthcare Facilities

High-Density Heat Gain Facilities

High-Pressure/High-Temperature Process

Industrial Ventilation

Laboratory Design

Life Cycle Cost Analysis (LCCA)

Machine Design

Material Handling Systems

Medical Gas & Vacuum

Performance & Energy Analysis Modeling

Pipe Stress Computer Analysis

Plumbing & Piping

Research Facilities

Sustainable Design

Temperature Control Systems
